

What Is An Estimate?

This is a good faith estimate only. This estimate does not indicate that the services or procedures have been preauthorized, pre-certified or predetermined by your insurance company. Actual amounts owed for the services provided may depend on your specific care needs at the time of service. This includes treatments or services considered necessary by your healthcare provider during the visit and additional information provided by your insurance.

Information About Estimates

The final out-of-pocket costs you may owe depends on many factors such as:

- The service or procedure location
- Insurance company and plan. Not all insurance companies and plans are in network with the location which services are provided.
- Anesthesia services
- Other services or procedures that your provider determined were needed for you
- The amount and type of medicines or infusions ordered and given in clinic
- Services that have frequency limitations
- Additional professional provider fees could include but are not limited to pathology, anesthesiology, attending physician, admitting physician and surgeon

This estimate does not include any benefit coverage from secondary insurance. The final cost to you will be determined by your insurance company when your claim is processed for payment.

Insurance Benefits Definitions

- **Deductible** – The amount you owe for covered services before your health insurance plan begins to pay. Some services are not subject to a deductible. Your deductible is often reset every plan year.
- **Coinsurance** – Your share of the costs of a covered service with your insurance company. You pay coinsurance after you've met your deductible.
- **Copay** – A fixed amount set by your insurance company that you are expected to pay at the time of the visit.
- **Maximum Out-of-Pocket** – The maximum amount you pay for covered services during the benefit year.
